ALUMINIUM MOBILE SCAFFOLD – Prices exclude GST

AUSTRALIAN SCAFFOLDS offer a broad range of mobile towers that cover the 3 duty classifications that come under Australian Standards. Heavy duty (675 kgs) - Medium duty (450 kgs) - Light duty (225 kgs). All towers are certified to Australian Standards and are Work Cover / Safe approved.

FEATURES

- * 50.8mm tube.
- * Guaranteed for life.
- * Adjustable wheels & brake.
- * Components are fully TIG welded.
- * Extruded and manufactured for T6-6061 alloy.
- * 5 times lighter than similar steel scaffold components.
- * Chemically tested and certified to the highest quality.

All our mobile towers come with ladders, toe boards and bracing. We have many different widths, lengths and heights to choose from. Scaffolds are used for many applications, including Painting, Theatrical and entertainment and building maintenance. Scaffold sections allow the user to easily add height to an existing tower.

If you are unsure or simply need some advice, either email us or pick up the phone and call our friendly experienced staff and we'll only be to glad to help.

Guaranteed for life *Compliant to Australian Standards *Safe to protect you *Fast to erect *Built to last

Please see our website for a full range of mobile towers.

FRAME SCAFFOLD – Prices exclude GST

Our frame scaffold system is rated heavy duty (675 kg's) and is suitable for all trades including: Bricklayers, demolition, carpenters, stone masons, steel fabricators etc. It is a great alternative for anybody who wants to buy and save.

The fantastic feature of our frame scaffold is that it is a prefabricated, light weight system and so fast to erect that can be installed by one person, saving time and money.

Bricklayers love to use frame scaffold because there are no standards between the bricklayer and the wall, giving full access to the face of the wall. Builders also love the fact that its fast to erect, one man installation, saves money & time. Frame scaffold is not only used by builders, many trades also benefit from the great features of frame scaffold.

Our frames are the best on the market, they are *hot dipped galvanised* and will not rust. Our frame scaffold is certified to Australian Standards.

If you are unsure or simply need some advice, either email us or pick up the phone and call our friendly experienced staff and we'll only be to glad to help.

***Guaranteed for life *Compliant to Australian Standards *Safe to protect you *Fast to erect *Built to last**

RUBBISH CHUTES – Prices exclude GST

Australian Scaffold provides expert installations and rentals of construction rubbish chutes. The flexibility of our system allows installation from windows, parapets, flat roofs or free standing scaffolds. Ideal applications include roofing, renovation, demolition, construction and industrial plants. GEDA chutes are made of heavy duty polyethylene, are safe, dependable and cost effective.

Tough and durable - Compared to ordinary rubbish chutes, the wear resistant GEDA rubbish chute has an extremely long working life thanks to its 6mm walls and the additional 3mm anti-wear ribs. Made from high quality, light weight, highly shock-resistant plastic, GEDA rubbish chutes can be fixed to scaffolds, walls, inclined roofs or flat roofs. The design also makes for efficient stacking. **Versatile and efficient** - GEDA rubbish chutes are equipped with a double hook and an efficient fixing device, allowing for fast and safe connection. Chute branch sections allow access from several levels. Various accessories are also available, such as special clamps for windows or parapet walls, and dust free collars for use in public areas. Tested for use up to 40m.
